The following companies supply information for Osiris:

Bureau van Dijk, CRIF, Datamonitor D&BTSR, Dow Jones, Edgar Online, the Economist Intelligence Unit, Exchange Data International, KIS, Factset, the Financial Times, Fitch Solutions, ktMINE, modeFinance, Moody’s, Morningstar, Thomson Reuters, Standard & Poor’s, Vadis, WorldVest Base, Zanders, Zephyr.
Information on listed companies across the globe

Osiris has extremely comprehensive information on listed, major unlisted and delisted companies around the world. Different templates show accounts in appropriate formats for their company type and location and you can also choose to see them in comparable formats for peer analyses. Osiris also includes complementary data including news, M&A deals and corporate structures.

Coverage
We aim to include all publicly listed companies on Osiris. We also include delisted companies and major unlisted companies if they’re significant within their sector. Osiris covers around 70,000 companies across the globe.

Range of reports
Osiris has companies’ financials in various formats so you can look at individual companies in depth as well as compare companies across borders. Companies, banks and insurance companies all have their own detailed formats that account for variations in their financial structures. The financial reports range from summaries, to standardised reports, to raw data. You can click on financial lines to see how a financial item is derived from the more detailed accounts. Osiris also includes accounts as they were originally filed or presented in companies’ annual reports.

Scope
In addition to financial accounts Osiris covers a wealth of complementary information including ratings, earnings estimates, news, industry research, royalty data, corporate actions, stock data, corporate structures and economic backgrounds.

Corporate structures
Osiris includes our bespoke corporate structures. We compile these in-house at BvD from information sourced from local information providers, stock exchanges, published sources and direct contact with companies.

Comparability
One of Osiris’ main strengths is that you can compare companies against each other using the harmonised financial reports.

Searching and analyses
Osiris offers a multitude of search criteria so you can do very specific searches and analyses. You can create your own variables to include in your searches, do time series searching, use the integral analysis software or use Osiris in conjunction with our more advanced analysis options including our Excel and PowerPoint Add-Ins.
The reports and the information they contain

Financial information
The financials are sourced from a number of expert companies. Banks and insurance companies are in specific formats. Other formats include: global standard, global detailed, spreadsheet, raw data, plus other provider-specific formats. Cash flow statements and segment data are also available. The reports have a section dedicated to the company’s financial strength. It contains independent financial models from four specialist companies: VADIS, MORE Ratings, Zanders and CRIF. The models have been specifically created to work with the financial data on our products and are exclusive to us. A pre-defined Comparison Report gives you an immediate comparison of a company against its peers.

Stock data
Security and price information, current and annual stock data, current and annual stock valuation, monthly, weekly and daily pricing series all provided by Exchange Data International (EDI).

Earnings estimates, broker recommendations and reports
Factset provides financial forecasts, detailed estimates and additional estimates. Recommendations are provided by Factset and Morningstar. Morningstar also provides equity research reports.

Corporate structures
Comprehensive ownership structures including tree diagrams, a company’s level of independence plus global and domestic ultimate owners – compiled by BvD.

Ratings
Company and country ratings from the three main agencies, S&P, Moody’s and Fitch.

News
News and M&A stories from Dow Jones, the Financial Times (newspapers and intelligence wires), Reuters, Zephyr and the Economist Intelligence Unit (EIU).

Industry research
Research from Datamonitor, Morningstar and the EIU. Reports are about both industries and individual companies. They include risk factors, SWOT analyses, commentary, histories and the competitive landscape.

Economic backgrounds
Country Outlook reports and key economic series from the EIU.

Corporate actions
EDI provide details of company meetings, dividends and changes in listing status.

Original documents
A library of PDFs of Annual Reports, Interim Reports, Corporate Responsibility Documents plus filings at local registries including Edgar SEC documents going back to 1999.

M&A deals and rumours
Current and historical deal information and rumours from BvD’s Zephyr database.

Individuals
BvD compiles information from its numerous providers on individuals associated to companies, including senior management, directors, general management and advisors. BvD allocates unique identifiers and establishes links between individuals.

Company overviews
A detailed, textual overview of the company covering topics such as history, activities, countries the company operates in, main products and services – these reports are unique to BvD.

Royalty agreements
Provided by ktMINE, a fully searchable database of royalty agreements and rates.

Some data sections are available as additional modules. Records are not all fully populated as information isn’t always filed or available.
Searching the database
You can search Osiris using any combination of hundreds of criteria, building your searches to find companies with very specific profiles.

Flexible reporting
You can create reports by choosing specific sections to include, or even select by line item, so your reports have the exact content you’re interested in.

Analyse
Integrated software helps you create sophisticated analyses for just one company, or a group of companies. You can segment a group of companies by your choice of variables.

You can analyse companies using the financials and ratios in the company reports, or you can create your own. You can use these “user defined variables” in your searches too.

Export*
You can export the reports, graphs and analyses into most packages for further analysis and to include in your presentations.

Alerts
Osiris has a sophisticated alert module. It will monitor companies, groups of companies, deals, news stories and financial data, and alert you to changes or new information.

Catalysts
Osiris also works with our range of catalysts. Our catalysts tailor our products to make your research more efficient for specific projects. They include: TP Catalyst (transfer pricing), Valuation Catalyst, Credit Catalyst, Compliance Catalyst and Procurement Catalyst.

Customise and integrate
You can customise Osiris to optimise it for you. The simplest customisation is to create your own ratios that match your own preferences and your in-house methods. You can also create analysis and presentation templates using our Excel and PowerPoint Add-Ins. These are ideal for more sophisticated analysis. You can upload your own data fields into Osiris, or integrate data from Osiris into your internal systems and workflow. You can seamlessly include data from Osiris on your intranet, CRM system, supplier database, credit system and other analytical tools.

*Ratings can’t be downloaded
Using osiris

Credit risk
- Detailed financials and financial strength data
- Bespoke analysis options
- Comprehensive information on individuals associated with companies
- Integrated software for benchmarking
- Additional business intelligence on trading environments and corporate structures

Compatible with Credit Catalyst

Corporate finance, M&A and valuations
- Flexible search criteria to pinpoint target companies
- Integrated software for benchmarking
- Current and historical M&A deals
